## Our Products & Services

### ETP

An effluent treatment plant is design to treat industrial effluent. To treat this effluent as per the PCB guidelines & make it ready for recycle & reuse for process.

### STP

Sewage treatment plant is design to treat the domestic sewage & make it reuse for gardening, flushing & underground water filling through a soak pit.

### RO

Reverse osmosis plant is design to remove the total dissolve solids from the water & make it usable for drinking as well as industrial process water.

### Softeners

Softener plant is work on this basis of ion exchange principle hard water having Ca+, Mg++ ions get replace with Na+ soft ions. Soft water is used for various home application.
